

ANNOUNCEMENT

June 20, 2008

To our valued Woodward Streamline™ customers:

We are pleased to introduce NGVI North America as the new owner of Streamline™ products. Effective June 20, 2008 aftermarket purchases of Streamline carburetors, regulators, fuel locks, and other products will be made through NGVI North America.

The NGVI (Natural Gas Vehicles International) family of companies: NGVI Inc., NGVI – Thai, NGVI North America, and the regional offices are solely devoted to alternative fueled vehicles of all types. NGVI Inc. is a supplier of CNG and LP engines worldwide, servicing all aspects of the fleet industry including, bus, automotive, certified lift-truck and others. NGVI has been servicing Doosan (formally Daewoo) worldwide for over 10 years, and supplying EPA certified engines to Doosan and Clark Material Handling since 2004. As such, NGVI North America understands the critical importance of flexibility toward the aftermarket customer's requirements as well as the necessity for prompt delivery of product and quick, efficient response to customer's technical inquiries.

Woodward and NGVI will maintain their long-term relationship, with Woodward continuing to design and manufacture certified systems that are serviced by NGVI and also by providing the necessary resources to support Streamline transition to NGVI. In addition, Richard Lane and Rick Tiedje have accepted positions with NGVI North America that are consistent to the positions they held at Woodward.

NGVI North America is looking forward to meeting and exceeding your expectations as a Streamline customer. Please don't hesitate to contact or visit our websites at:
