

THE WOODWARD TRAINING CENTRE

The Woodward Training Centre classes provide technical information and hands on experience for people who work with Woodward control systems. Whether you work with Mechanical or Electrical control systems, the goal of each class is to enable you to understand:

- Woodward controls in general, including control functions and theory.
- Proper control operation and maintenance.
- Control adjustment and calibration procedures.
- Test procedures for checking a controls operation.
- Procedures for troubleshooting systems to pinpoint problems.
- Problem solving techniques through class discussions.

CLASS TYPES

Two types of classes are available to meet your training needs. The standard in-house classes are taught at the Training Centre at Ballabgarh. We could also design a custom tailored class for the complete range of Woodward controls to suit your application specifically, to be conducted at your site. We can organize custom tailored training classes for our O.E.M's.

ENROLLMENT

Class size is limited to provide students better opportunities for learning. **Please register early to ensure a place.** To complement a class, visual aids, handouts and publications are used. The publications are yours to keep for reference. All materials for the class will be supplied.
