**ESEPRO**

Profibus gateway for Woodward Easygen genset controls and LS-5 controls

**ESEPRO** is a Profibus gateway specifically designed to interface Woodward’s Easygen series genset controls with Profibus-DP networks. It interfaces via the CAN bus with the Woodward controls and is easy to configure using standard Profibus configuration tools like Simatic Manager.

A single ESEPRO added to the CAN network will make all Visualisation Data of connected Woodward CANopen controls available without adding additional load to the CAN bus communication. The Visualisation Data is buffered in the ESEPRO gateway which decouples Profibus’ cyclic process I/O from the CANopen cyclic TPDO transfers.

The ESEPRO appears as a modular I/O module in the Profibus configuration tool.

The ESEPRO offers three different methods to map data into the PLC’s process I/O image to suit different application requirements and programming styles. Visualisation Data of connected Easygen and LS-5 devices can be mapped directly into the PLC’s process image. For larger data tables which exceed the Profibus I/O space, an indexed mapping similar to the Profindrive standard can be used. Alternatively access to larger data tables via acyclic DP-V1 transfers is also possible. In addition, read and write access to the Easygen’s device Parameter IDs is possible which are internally translated to CANopen SDO transfers.

Common applications include:

- PLC connection
- Operator panel interfacing
- HMIs
- SCADA integration
- Power station automation
- Gen set control
- Remote control & monitoring
- Data logging

**Features**

- Supports Easygen-3000 Series (3500, 3400, 3200, 3100)
- Supports Easygen-2000 Series
- Supports Easygen-1000 Series
- Supports LS-5
- Supports DTSC-200
- Addresses up to 8 Woodward controls
- Easy configuration using Simatic Manager
- Direct mapping of data into process I/O
- Fast indexed access to Basic Visualisation Data table
- Acyclic DP-V1 functions to read and write Remote Control words
- Acyclic DP-V1 access to larger data blocks
- Reading and Writing of device parameters
- Internal buffer for Visualisation Data
- Transparent handling of data guarantees future compatibility
- Firmware upgradable via Ethernet bootloader
**Usage**

- **PROFIBUS**
- **CANopen**
- ESEPRO gateway

**Connections**

- Profibus
- Monitoring/Diag
- DIN rail clip
- 24V DC
- CAN

**Specifications**

<table>
<thead>
<tr>
<th>Interfaces</th>

<th>Environment</th>
<th>Form factor / enclosure</th>
<th>Compliance</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Profibus</td>
<td>10BASE-T</td>
<td>0° to 60 °C / 32 to 140 °F</td>
<td>Self-extinguishing PC/ABS (UL 94-V0)</td>
<td>C-Tick</td>
</tr>
<tr>
<td>1 CAN</td>
<td>IP, TCP, HTTP, ARP, TFTP</td>
<td>-25° to 80 °C / -13 to 185 °F</td>
<td>35 mm DIN rail mountable</td>
<td>CE, RoHS</td>
</tr>
<tr>
<td>1 Ethernet for Monitoring/Diagnostics</td>
<td>1.5 kV galvanic isolation</td>
<td>10 to 95% humidity, non-condensing</td>
<td>IP 20 / NEMA Type 1</td>
<td>FCC Part 15 (Class A)</td>
</tr>
</tbody>
</table>

**User interface**

- Power, Device, Profibus/CAN & Ethernet Status LEDs
- Web browser interface for Monitoring

**Profibus interface**

- DE9F with Profibus standard pinout
- EIA-485-A (RS-485) physical layer
- 9.6 kBit/s - 12 MBit/s
- Profibus DP-V0 and DP-V1 Slave
- 500 V galvanic isolation

**CAN interface**

- DE9M with industry standard
- CAA 50-102 pinout
- ISO 11898 physical layer
- 250 kBit/s
- CANopen consumer & client
- Addresses up to 8 nodes

**Power requirements**

- 10-30 V DC, 1 W
- 30 mA typical @ 24 V DC

**High availability**

- Watchdog supervision
- Brown-out detection

**Electromagnetic compatibility**

- Emissions CISPR 22/EN 55022 (Class A)
- Immunity EN55024
- Electrostatic discharge EN61000-4-2
- Radiated RF EN61000-4-3
- Fast transients EN61000-4-4
- Conducted RF EN61000-4-6
