The MRM4 is a protection relay which uses the latest Dual-Core-Processor Technology to provide precise and reliable protective functions and is very easy to operate.

The MRM4 provides all necessary functions to protect low and medium voltage motors at all power levels. The protection functions are based on current measurement. They supervise the motor start sequence (motor start), they detect a stall or locked rotor condition and they monitor the thermal condition of the motor.

Overcurrent and earth overcurrent protection as well as unbalanced load protection are included in the protection package. The status and operation of the motor will also be monitored by means of the statistic and trend recorder. All important events and measuring values will be logged by means of the start, event, failure and disturbance recorder.

The protection functions of the MRM4 have been adapted to comply with the requirements of the VDE-AR-N-4110:2018.

**FUNCTIONS**

- Low and high voltage asynchronous motors. Protection based on current measurement values
- Thermal overload protection 49M
- Locked rotor protection 51LRS
- JAM or Stall protection 51LR
- Underload protection 37
- Motor start 48
- Starts per Hour 66
- Negative phase sequence (current unbalance) 46
- Overcurrent/short circuit prot. 50P/51P
- Earth overcurrent and short circuit protection 50N/51N
- Reclosing lockout 86
- RTD supervision via external temperature box 26 (type MRM4-2B, on request)
- Wattmetric Ground Fault Protection

**TOTAL COUNTER**

- Breaker wear values
- Motor run time
- Motor operation counter
- History

**MOTOR START RECORDER**

- Max. RMS values of phase currents
- Negative phase sequence currents
- Start duration
- Used thermal capacity
- Successful starts
- Temperature profile (optional)

**STATISTIC RECORDER**

- Number of successful starts
- Average I2T values
- Average max. start current

**ADDITIONAL RECORDERS**

- Disturbance recorder: 120 s non volatile
- Fault recorder: 20 faults
- Event recorder: 300 events
- Trend recorder: 4000 non volatile entries

**COMMISSIONING SUPPORT**

- USB connection
- Customizable Display (Single-Line, ...)
- Customizable Inserts
- Copy and compare parameter sets
- Forcing and disarming of output relays
- Fault simulator: current and voltage
- Graphical display of tripping characteristics
- 8 languages selectable within the relay

**TIME SYNCHRONISATION**

- SNTP, IRIG-B00X, Modbus, DNP 3.0, IEC60870-5-103/-104

**IT SECURITY**

- Menu for the activation of BDEW-Whitepaper-compliant security settings (e.g. hardening of interfaces)
- IT Security Logger
- Syslog (to centralized server)
- Encrypted connection with Smart view

**ADDITIONAL HIGHLIGHTS**

- 20 mA output (Type MRM4-2B)
- Long starting time for reduced voltage starts
- Emergency Start
- Incomplete sequence
- Anti-backspin time delay
- Permitted number of cold starts
- Supervision of starts per hour
- Mechanical load shedding
- Zero speed detection (stall) via digital input
- Motor stop inputs
- External alarm and trip inputs
FUNCTIONAL OVERVIEW

Protective Functions

- IEC60870-5-103, Modbus TCP, DNP3.0 TCP/UDP, IEC60870-5-104 | Ethernet 100 MB/RJ45: M*

Harsh Environment Option
- None: A
- Conformal Coating: B

Available menu languages
- English / German / Spanish / Russian / Polish / Portuguese / French / Romanian

* Within every communication option only one communication protocol is usable.
Smart view can be used in parallel via the Ethernet interface (RJ45).

The parameterizing- and disturbance analyzing software Smart view is included in the delivery of HighPROTEC devices.
