

## MicroNet™ Plus/MicroNet TMR® CPU5200 Ethernet Connector LED Color Change

### Product Change / Improvement

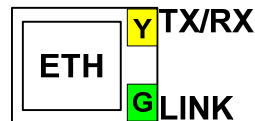

The MicroNet™ Plus/MicroNet TMR® CPU5200 product family uses a 4-port Ethernet connector for general Ethernet connectivity and Real Time Networking. An unanticipated sourcing issue has resulted in a shortage of the Ethernet connector, and in order to meet our customer's delivery expectations, Woodward will temporarily change to a functional equivalent.

The original Ethernet connector uses a solid yellow LED to indicate the **Link** and flashing green to indicate **TX/RX**. The replacement Ethernet connector uses green for **Link** and yellow for **TX/RX**. There are no other changes to form, fit, or function.

#### Before change:

#### After change:

These LEDs are typically used only during system commissioning and troubleshooting, and do not affect the functionality of the system or the ability to troubleshoot.

### Updated Products

The following Woodward items/revisions will use the different Ethernet LED colors:

This change will be implemented beginning with serial number 18983121 with an anticipated conversion back to the original connector in mid to late November, 2013.

**Hardware**—MicroNet Plus systems configured for redundant CPU/RTN operation only

#### Plus CPU5200 Module Item Numbers:

- 5466-1035 rev M
- 5466-1045 rev D
- 5466-1145 rev B

#### RTN Module Item Numbers:

- 5466-1036 rev M
- 5466-1046 rev D
- 5466-1146 rev B

#### TMR CPU5200 Module Item Number:

- 5466-1047 rev F

### Customer Action

No action is required. The change to the Ethernet connector does not change the functionality of the system—only the LED colors are reversed.
