

MicroNet SIO Module

Product Change/Improvement

The legacy MicroNet SIO (Serial I/O) modules will be inactivated by April 30th, 2025 at the latest, as there is only a limited number of components still available.

In 2019, Woodward released new versions of the MicroNet Plus SIO modules, optimized for use with 5200 and P1020 CPUs and requiring Coder 4.06 or later. These SIO modules remain active and available. They are “drop-in” backwards compatible, using the same GAP blocks.

The new and old SIO modules have been validated to work in parallel in the same chassis.

Obsolete Module

Program	Upper Level	Description
MicroNet	5501-471	SIO Module with Screw Posts
MicroNet	5466-348	SIO Module with Slide Lock

Updated Products

The change to part numbers is as follows:

Program	Upper Level	Description	Replaces Upper Level
MicroNet	5466-5006	SIO Module w/ Screw Posts	5501-471
MicroNet	5466-5007	SIO Module w/ Slide Lock	5466-348

Usage Restrictions: 5466-5006 and 5466-5007 are only for use in MicroNet Plus systems (Coder 4.06 or later). The new modules have not yet been qualified for use with MicroNet TMR.

Customer Action

Please migrate all production usage to the new MicroNet SIO modules. For information on how to upgrade your system, please refer to manual 26166 or consult with Woodward technical support as indicated below.

For additional information and support:

1. Contact your local Woodward representative and/or turbine OEM.
2. Woodward contact and business partner information can be obtained at www.woodward.com.
3. Technical assistance can be obtained by:
 - a. Searching for a local contact at www.woodward.com/directory
 - b. Call or email the Woodward Turbine Help Desk:
1-970-498-3095
