Mark 100

Technical Bulletin

Long stroke lengths for fine control with superior capacity in smaller valve sizes

The Flowserve Mark 100 globe control offers the highest flow capacity, as well as fast, easy maintenance in both gas and liquid control. The Mark 100 also has longer stroke lengths providing finer control — resulting in superior process control in smaller valve sizes.

With a clamped-in seat ring, the Mark 100 has been designed for easy maintenance and flexibility. The seat retainer (cage) in the Mark 100 can be changed out to provide an exceptional variety of severe service options, including anti-cavitation and anti-noise.

This bulletin has been designed to provide clear, easy to find information, allowing the user to specify and apply the Mark 100 control valve. Further sizing details are available in Performance!, the Flowserve control valve sizing program. Please contact your local Flowserve representative for further details.

The plug is always pressure-balanced to allow smaller and more economical actuators. Flow over or under the plug is available.

Figure 1: Mark 100 Ultra-Capacity Control Valve

Table 1: Specifications

Style	Globe
Sizes	6 inch through 30 inch
Pressure Classes	ANSI 150 through 600
End Connections	Flanged, buttweld
Face to Face	ISA 75.03, flanged; ISA 75.05, buttweld
Face Finish	Standard: 125-250 Optional: 250-500
Bonnet	Standard, extended
Packing Options	PTFE Vee-ring, PTFE square, Graphite, Graphite-braided, SureGuard, SureGuardXT, SafeGuard, others on request
Trim Types	
Standard	Equal Percent, Linear, Quick Open
Low Noise	MegaStream, Stealth, TigerTooth
Anti-Cavitation	CavControl, ChannelStream, TigerTooth
Trim Materials	400 series, 300 series stainless steels
Leakage Rates	ANSI Class IV, VI (with optional soft seat), Class V

Table 3: Severe Service Trim Options*

Trim	Description	
CavControl	Anti-Cavitation, controls cavitation by directing the bubbles away from metal surfaces	
ChannelStream	Anti-Cavitation, eliminates cavitation through staged pressure drops	
MegaStream	Anti-Noise, eliminates noise through staged pressure drops, attenuation and frequency shifting	
TigerTooth, noise	Anti-Noise, eliminates noise through staged pressure drops and attenuation	
TigerTooth, cavitation	Anti-Cavitation, eliminates cavitation through staged pressure drops	
Stealth	Anti-Noise, eliminates noise through staged pressure drops, attenuation and frequency shifting	

*For full details, see document VLATB0103.

Standard actuator size is 100 for all valve sizes up through 14"; size 200 for valve sizes 16" - 20"; and size 300 for valve sizes 24" and 30".

For packing friction data, refer to VLAIM0040, Standard and Environmental Packing Systems, or the Performance! sizing software.

* Only available in VL-ES

Figure 4: Actuator Mounting Dimensions

Note: Dimensions are with the plug on the seat.

Figure 5: Characteristic Flow Curves, 10", Full Area

NOTE: Flow curves are representative. See Sizing and Selection manual or Performance! sizing software for detailed curves for each trim and valve size.

Figure 6: Mark 100 F_i Values

NOTE: F_i values shown represent an equal percentage, full area, standard trim.

Flowserve Corporation has established industry leadership in the design and manufacture of its products. When properly selected, this Flowserve product is designed to perform its intended function safely during its useful life. However, the purchaser or user of Flowserve products should be aware that Flowserve products might be used in numerous applications under a wide variety of industrial service conditions. Although Flowserve can (and often does) provide general guidelines, it cannot provide specific data and warnings for all possible applications. The purchaser/user must therefore assume the ultimate responsibility for the proper sizing and selection, installation, operation, and maintenance of Flowserve products. The purchaser/user should read and understand the Installation Operation Maintenance (IOM) instructions included with the product, and train its employees and contractors in the safe use of Flowserve products in connection with the specific application.

While the information and specifications contained in this literature are believed to be accurate, they are supplied for informative purposes only and should not be considered certified or as a guarantee of satisfactory results by reliance thereon. Nothing contained herein is to be construed as a warranty or guarantee, express or implied, regarding any matter with respect to this product. Because Flowserve is continually improving and upgrading its product design, the specifications, dimensions and information contained herein are subject to change without notice. Should any question arise concerning these provisions, the purchaser/user should contact Flowserve Corporation at any one of its worldwide operations or offices.

For more information about Flowserve Corporation, visit www.flowserve.com or call USA 1-800-225-6989.
