

APTL and DSM Synchronizer End of Life

Product Change

Woodward's APTL and DSM Synchronizers have historically been significant product lines that Woodward has continuously supported since the 1980s. However, due to a lack of obtainable components, increasing maintenance costs, and declining volume, Woodward is forced to rationalize the remaining active products in these product lines. To help support existing customers with an installed base, Woodward is offering a limited Last Time Buy (LTB) opportunity.

Product Support Schedule

Now - Dec 31st, 2026 (item status: "active"; LTB orders accepted on case-by-case basis until July 31st, 2026)

- Limited new sales based on availability of obsolete components
- Limited spare units based on availability of obsolete components
- Limited repairs based on availability of obsolete components

Jan 1st, 2027 – Sep 30th, 2028 (item status: "inactive"; warranty/repair orders allowed):

- Limited repairs based on availability of obsolete components

Woodward will continue to support the product while under its original factory warranty.

Affected Units

APTL Product Family:

| Item No. | Description |
|----------|------------------------|
| 9905-007 | APTL Control |
| 9903-527 | APTL Control (Nuclear) |

DSM Synchronizer Product Family:

| Item No. | Description |
|----------|----------------------------------|
| 9905-204 | DSM Synchronizer (Voltage Match) |

Replacement Product

There are no drop-in replacements for either product family. Please contact Woodward or your APTL or DSM Synchronizer supplier to discuss replacing these legacy products with easYgen-3100XT/-3200XT in your existing applications or creating a dedicated retrofit package to replace these controls.

Customer Action

Prior to July 31st, 2026, contact your local Woodward representative for LTB opportunities or to discuss available upgrade/mitigation products. Beginning August 1st, 2026, new orders will not be allowed for any of the products listed under the Affected Units section. Final shipment of all LTB orders will be scheduled no later than December 31st, 2026, as products will be inactivated after this date and only repair and warranty orders may be processed. Please note that there are a limited number of orders that can be placed for these items based on obsolete component availability.

Note – Component obsolescence from electronic manufacturers can present a challenge to post-life

support plans. Woodward strives to hold inventory or look for alternative parts when the components we use are no longer available. However, there are times when components simply cannot be obtained and where sufficient last-time purchases cannot be made. Unfortunately, in these cases Woodward cannot guarantee the rationalization support plan.
