Notification for using WIC1-Soft with Windows Vista

After installation of WIC1-Soft an additional setting must be done.

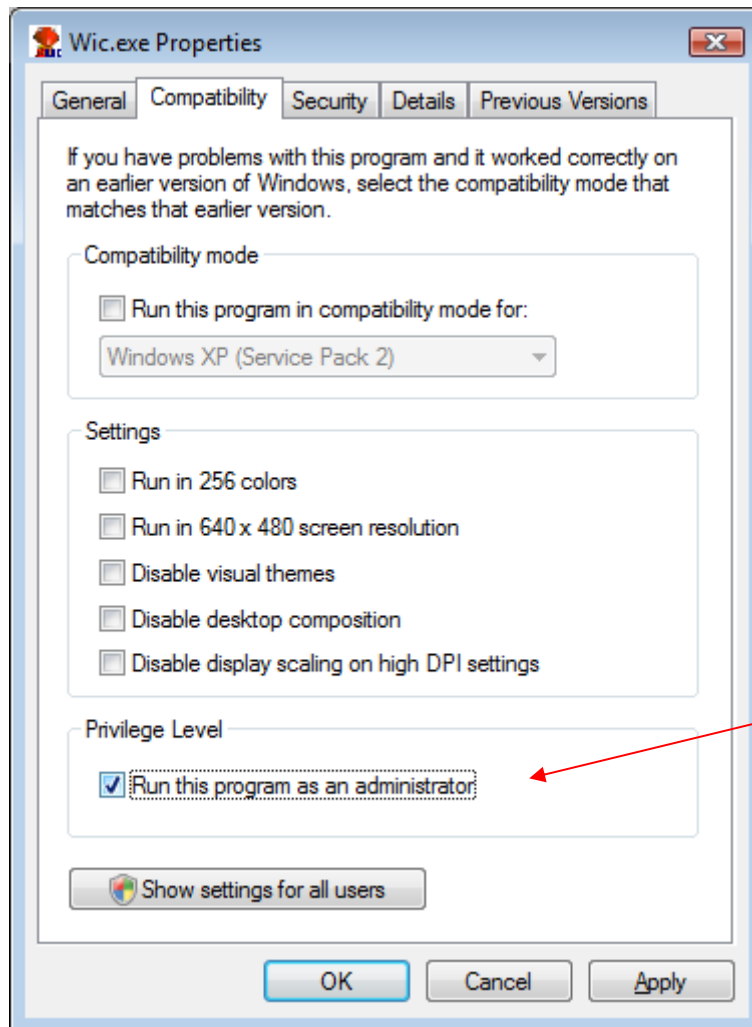

- Open the Explorer

Find the program "Wic.exe" The standard installation folder is program files/WIC_V1

Click the right button of the mouse and open the field: Properties

Activate the checkbox: Run this program as an administrator

After WIC1-Soft is starting the window User Account Control (UAC) pops up

Please ALLOW to run this program

Allow (I trust this program. I know where it's from or I've used it before)
