quick introduction clip

Which easYgen-3000XT for which application?

easYgen-3100XT/3200XT

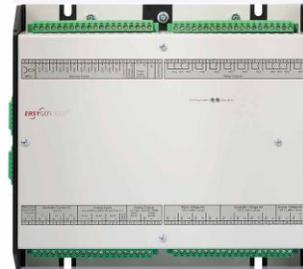

> 8440-2081

> 8440-2082

easYgen-3400XT/3500XT-P1

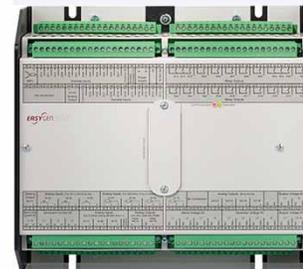

> 8440-2084

> 8440-2085

easYgen-3400XT/3500XT-P2

> 8440-2087

> 8440-2088

- > 8446-1071/-72/-73
- > easYview (7", 10", 15")
- > Remote Touch panel

Main differences of different versions

easYgen-3100XT/3200XT

- › Synchronization GCB, MCB, Generator/Engine/Mains protection
- › 2 x CANBus, 1 x RS485 & 1xE-Net Modbus TCP
- › 3 x flexible PID's for speed & voltage bias
- › 2 PT bus sensing Mains sensing
- › Loadsharing via E-Net and/or CANopen, ModbusMaster, redundant control 2.17

easYgen-3400XT/3500XT-P1

- › Synchronization GCB, MCB, +GGB, +Run-up Synch, +LS-6XT, GC3400XT Support +690VAC sensing, +inbuilt AVR Regulation
- › 3 x CANBus, 1 x RS485 & 3 x E-Net Modbus TCP
- › 3 x flexible PID's for speed and voltage bias
- › 2 PT bus sensing Mains sensing
- › Loadsharing via **redundant** E-Net or CANopen, ModbusMaster, redundant control 2.17

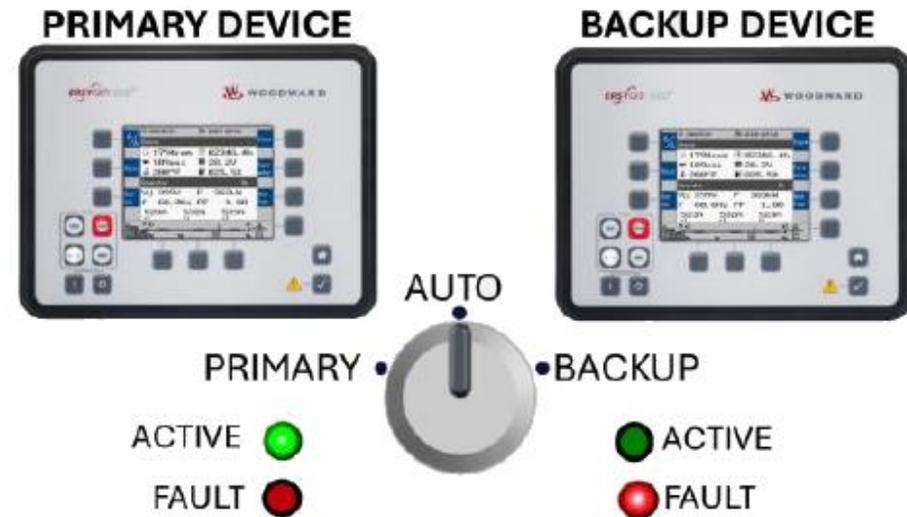

easYgen-3400XT/3500XT-P2

- › Synchronization GCB, MCB, +GGB, +Run-up Synch, +LS-6XT, GC3400XT Support +690VAC sensing, + inbuilt AVR Regulation
- › 3 x CANBus, 1 x RS485 & 3 x E-Net Modbus TCP
- › 3 x flexible PID's for speed and voltage bias
- › 3 PT bus sensing for rotation check, Mains sensing
- › Second board with additional digital/analog I/Os, pulse outputs for kWh & kVArh
- › Loadsharing via **redundant** E-Net or CANopen, ModbusMaster, redundant control 2.17

easYgen-3000XT redundant control solution

Starting with software release 2.17, all easYgen-3000XT catalog packages (8440-2081 through 8440-2088) will include redundant functionality, allowing the use of two controllers for each genset. LS-612XT-P1/P2 redundant functionality available end of 2025

- › Cold Redundancy
 - › Backup system is off and inactive
 - › Requires manual or automated start-up
- › Warm Redundancy
 - › Backup system is on but in standby mode
 - › Faster switch-over than cold redundancy
- › Hot Redundancy
 - › Backup system runs in parallel with the primary system
 - › Immediate failover with minimal downtime

[Download Case Study](#)

Typical easYgen-3200XT Use Cases one part number fits all

easYgen-3200XT use cases

easYgen-3200XT Single Set grid tied with island mode

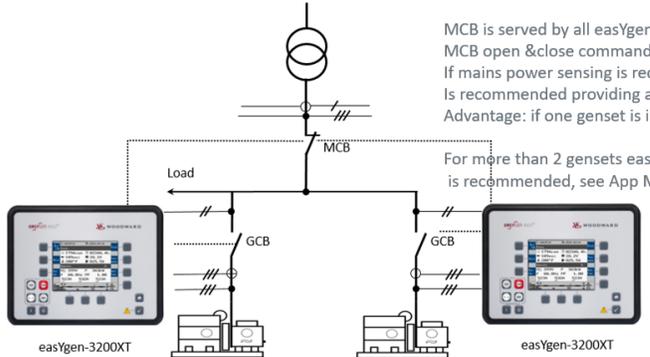

Single genset AMF&ATS
 Open/closed transition (<100ms)/ soft power transfer
 Import/export/baseload control
 Interconnected to grid

easYgen App Mode A04 GCB/MCB

easYgen-3200XT Multiple Sets Mains & Island Parallel

kW/kVAR Load sharing via CAN open

2 or more gensets AMF&ATS
 Open/closed transition/ soft power transfer
 Import/export/baseload control
 Interconnected to grid and island parallel operation

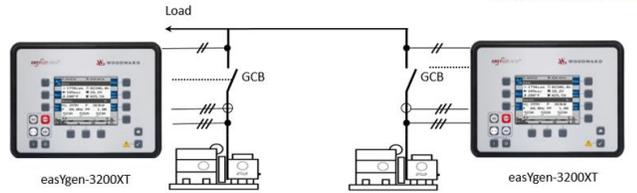

MCB is served by all easYgen,
 MCB open & close command wired in parallel
 If mains power sensing is required a 3 phase Transducer
 Is recommended providing a 0/4-20mA Setpoint to all easYgens
 Advantage: if one genset is in service second genset is still available

For more than 2 gensets easYgen3500XT & LS-6XT
 is recommended, see App Mode A08

easYgen App Mode A04 GCB/MCB

easYgen-3200XT Multiple Sets island parallel

kW/kVAR Load sharing via CAN open

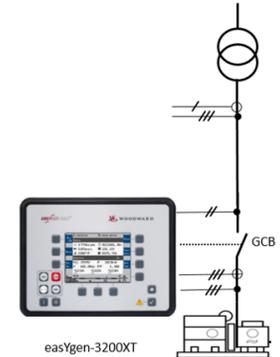

Up to 32 gensets can paralleled on one bus
 kW and kVAR sharing via CAN bus and/or E-Net
 Load dependent starts & stop

If you have more than 32 gensets on one bus, go for
 easYgen-3500XT and GC3400XT

easYgen App Mode A03 GCB

Up to 32 gensets

easYgen-3200 Sets Mains parallel

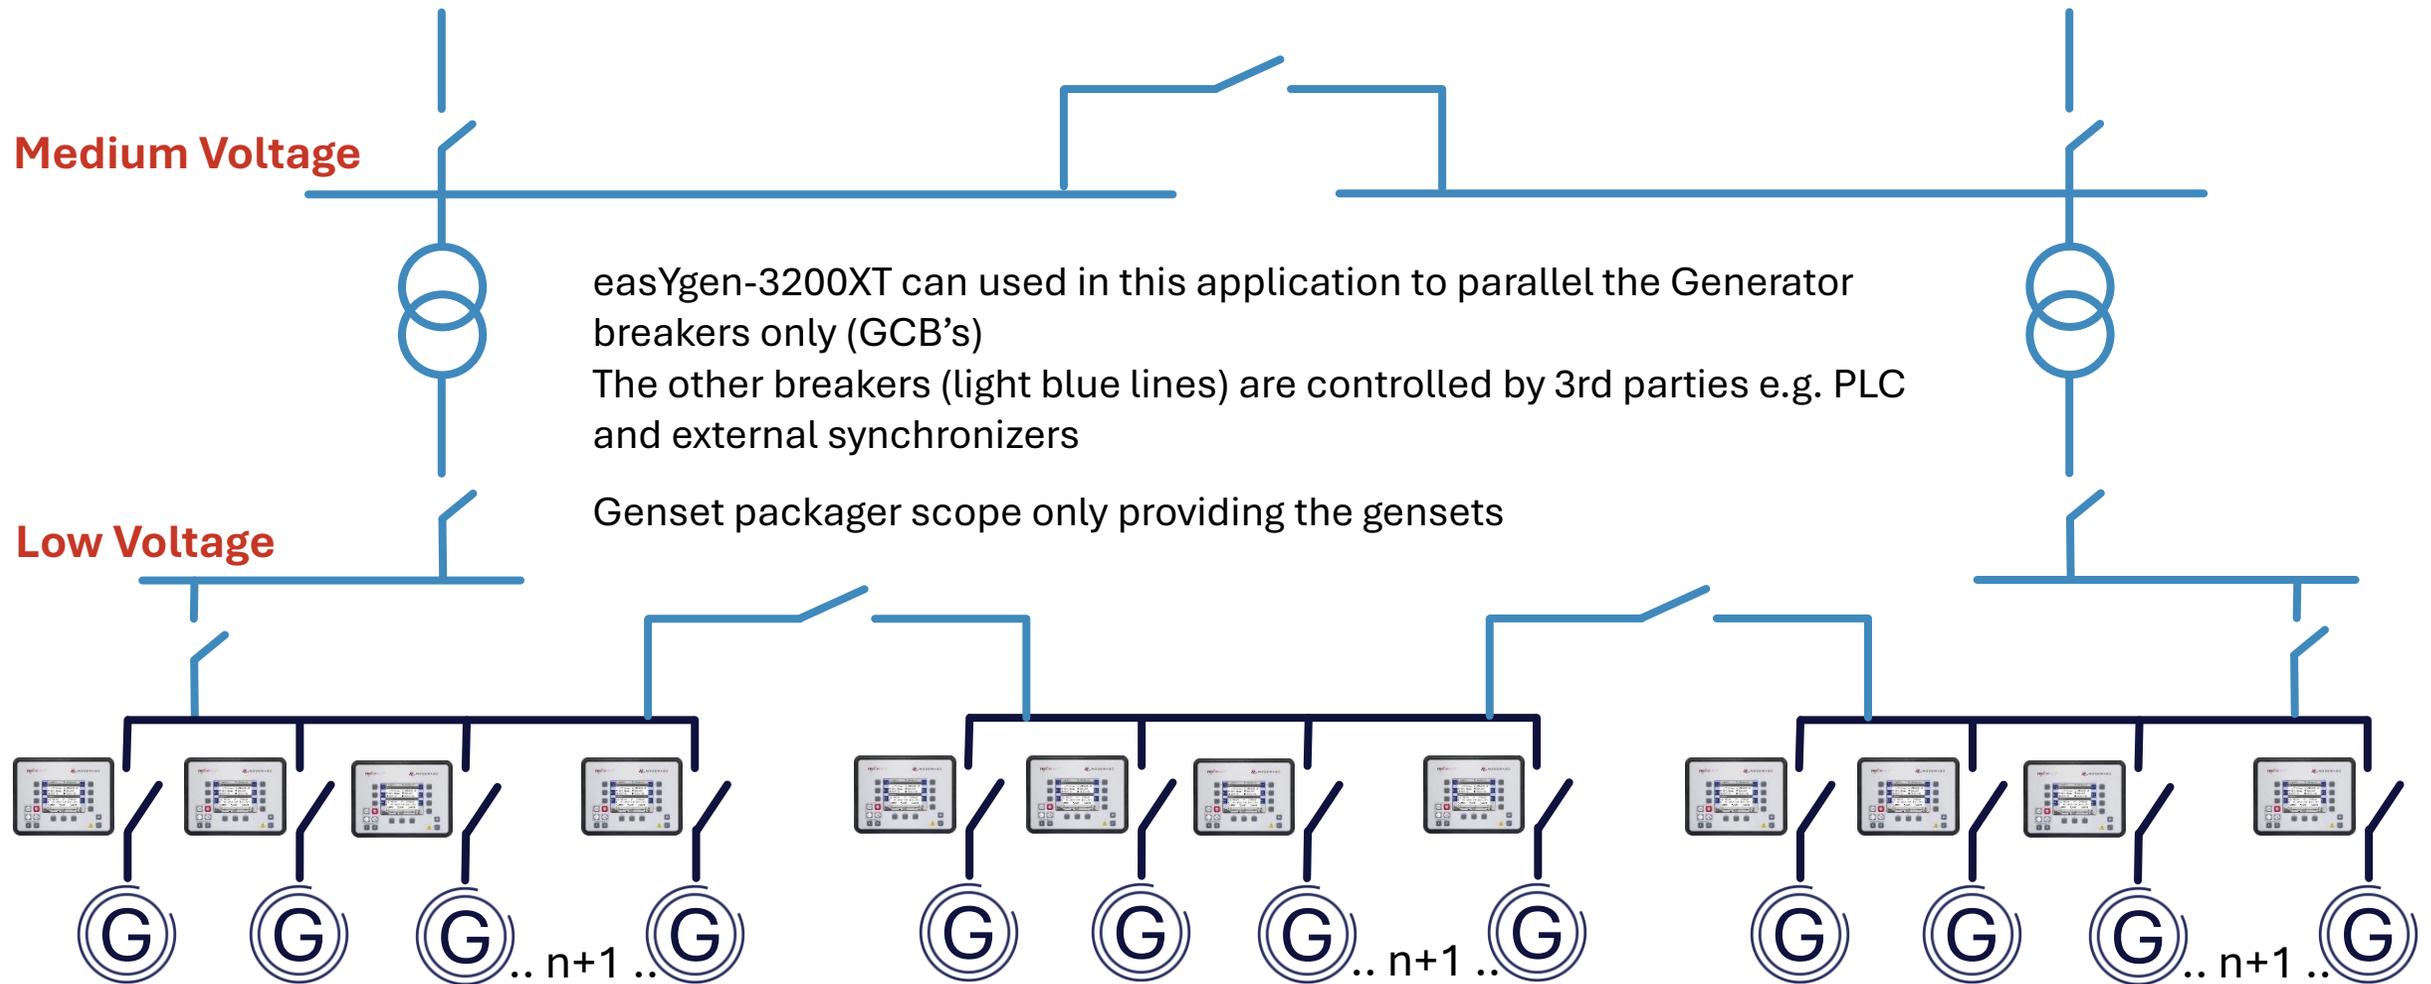

Import/export control
 Load dependent starts & stop
 Continuous mains parallel operation

Typical application: CHP, prime power generation

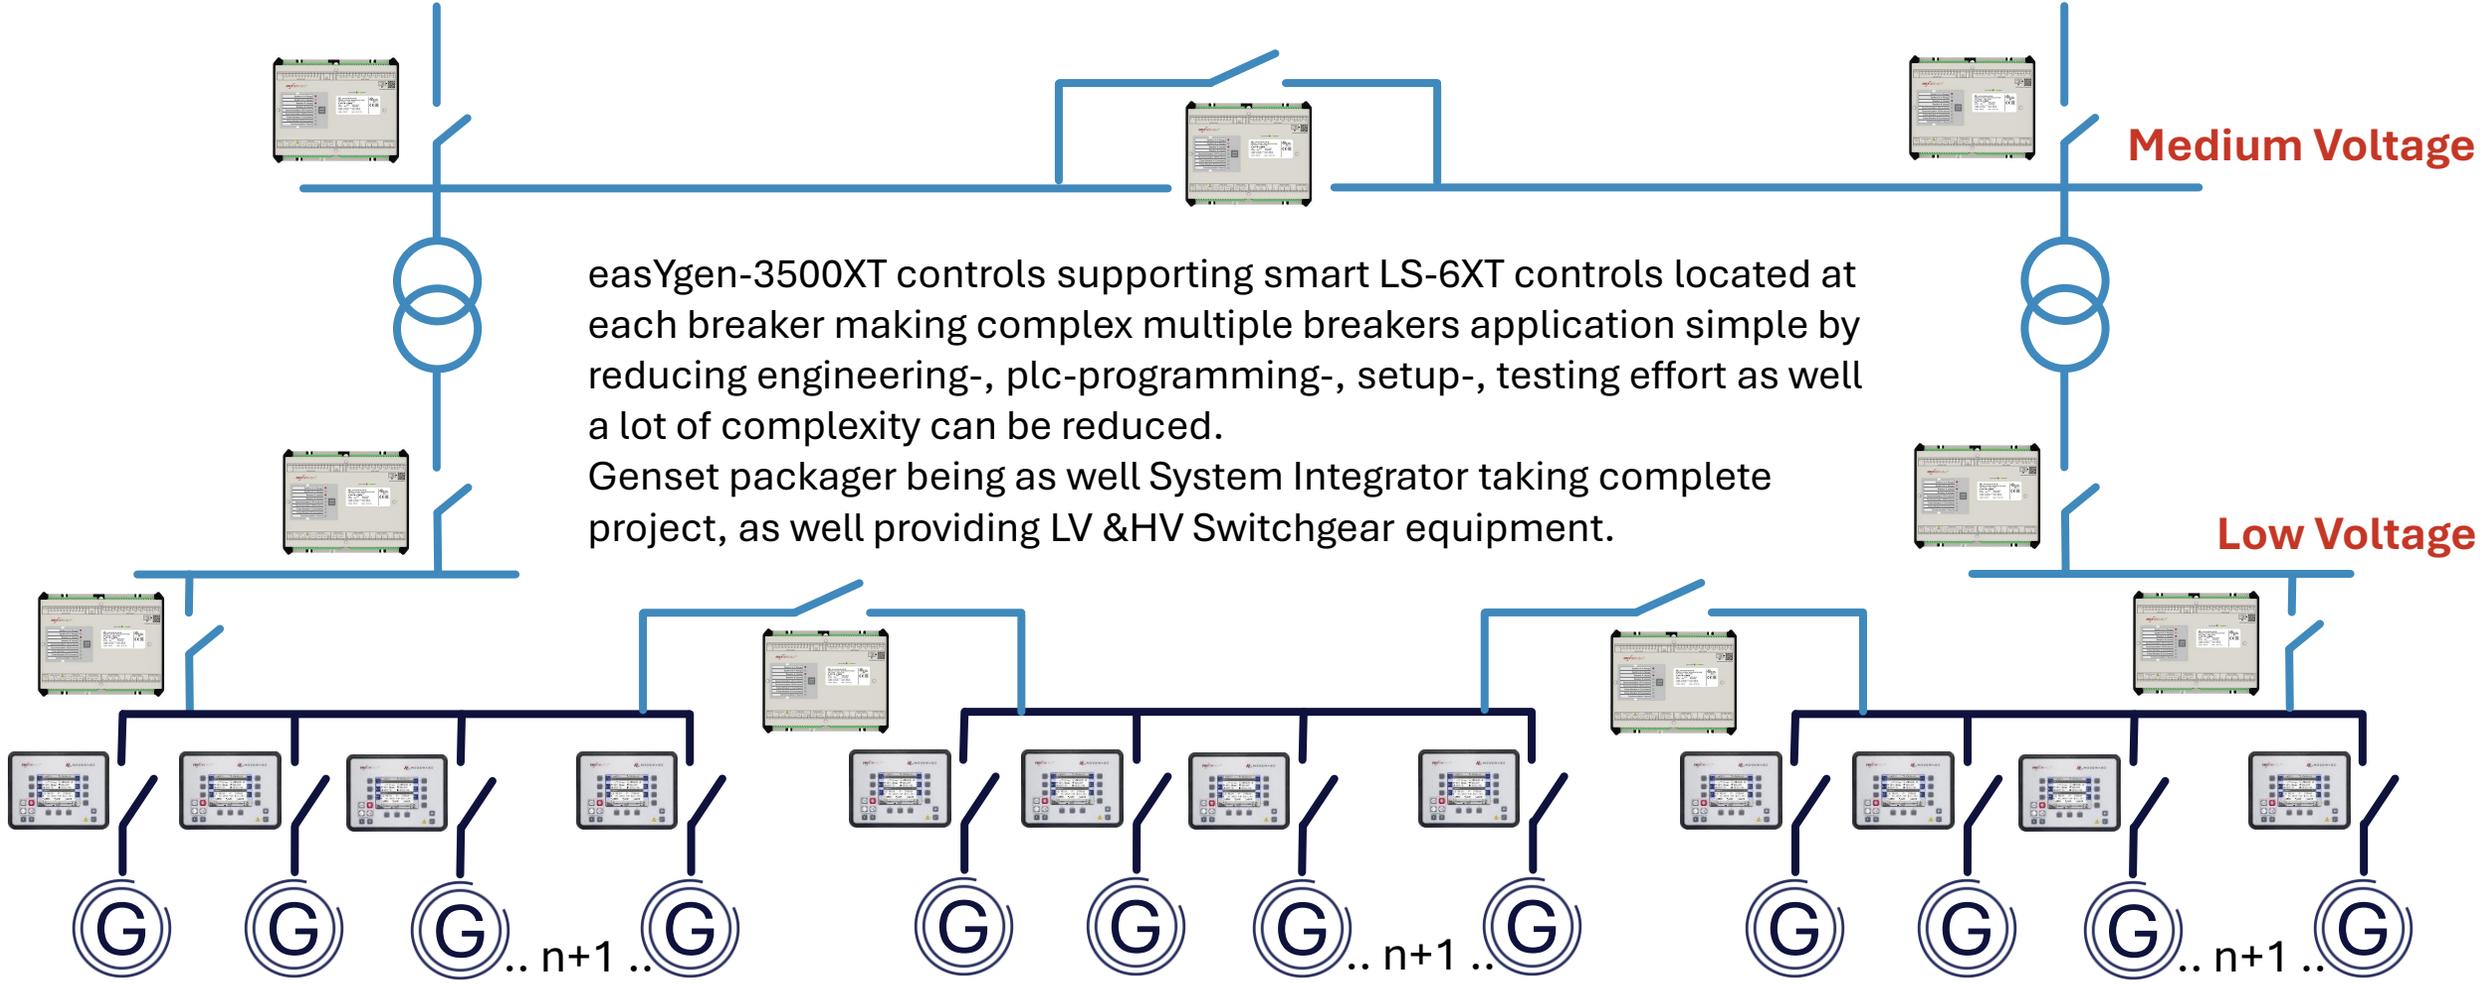

easYgen App Mode A03 GCB

Typical Datacenter Application

Typical easYgen-3500XT Use Cases one part number fits all

Executed Datacenter Project

easYgen-3500XT controls supporting smart LS-6XT controls located at each breaker making complex multiple breakers application simple by reducing engineering-, plc-programming-, setup-, testing effort as well a lot of complexity can be reduced.
Genset packager being as well System Integrator taking complete project, as well providing LV &HV Switchgear equipment.

LS-612XT-P1

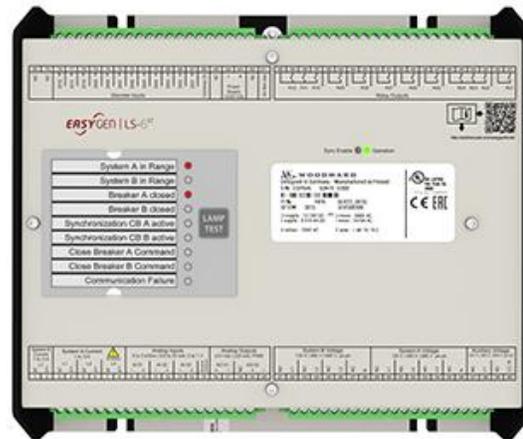

A LS-612XT-P1 controller is a smart Synchronizer transferring true RMS voltages via redundant E-net/CANopen to the easYgen-3400/3500XT genset controllers taking care of GCB and providing this information then to engine and generator controls to parallel other circuit breakers (MCB's, GGB's-T-couplers) within the application.

As well LS-612XT's and easygen controllers taking care of segmentation.

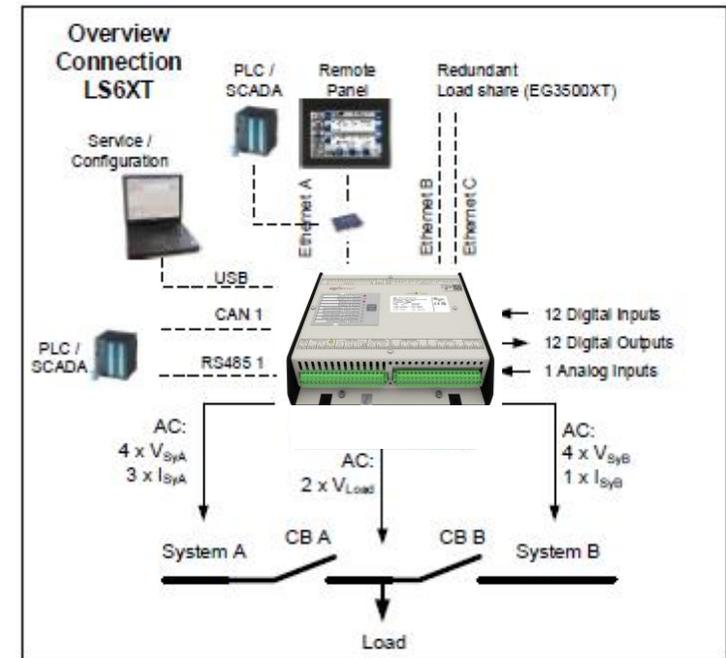

LS6XT has three measurement system: System A, auxiliary voltage and System B capable to serve one or two breakers.

- > LS-612XT-P1

8440-2222 LS-612XT-P1 Application Overview

8440-2317 LS-612XT-P2 Application Overview

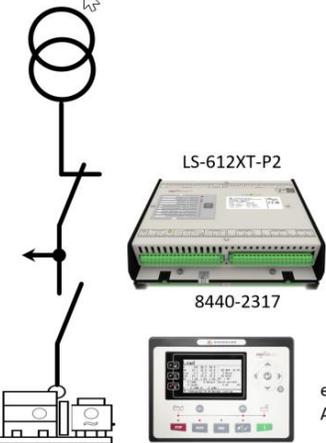

Additional to LS-612XT-P1

- > up to 4 IKD2M (32DI/32DO)
- > up to 2 easYlite-200
- > Comfortable Current protection
 - > Instantaneous overcurrent 1/2/3 (50)
 - > inverse time overcurrent (51)
 - > voltage restraint overcurrent (50V/51V)
 - > Directional Overcurrent protection (67)
- > Load Protection
 - > overload import level 1/2
 - > overload export level 1/2
 - > Unbalanced load (46)
- > Active synchronization to be used as independent paralleling control
- > ABS & LR marine approval

Other LS-612XT-P2 use cases

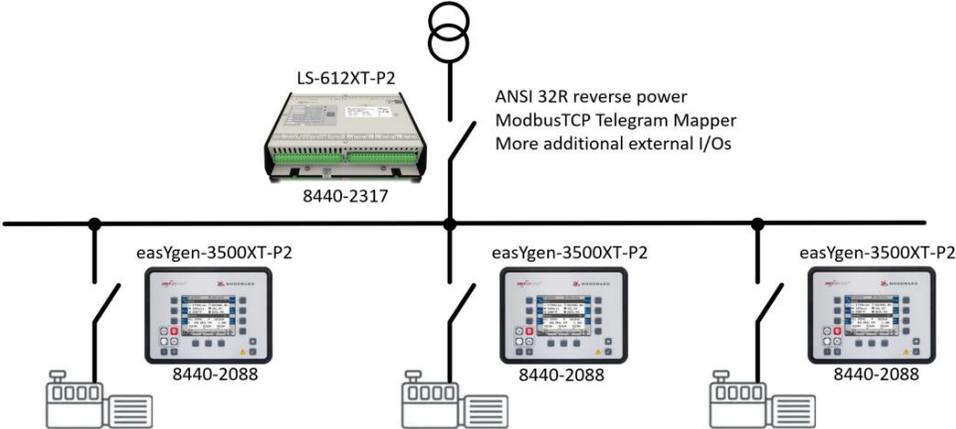

ATS closed transition active back synch

- Mains Failure detection
- ATS Mains to Generator supply
- Active speed & voltage biasing genset for faster closed transition

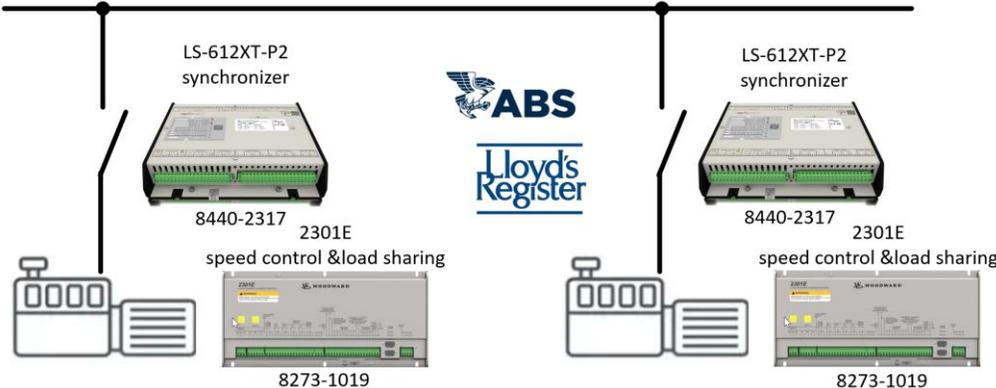

easYgen-800
Auto Start Control

LS-612XT-P2 for vessel shore connection

LS-612XT-P2 for Hydro Application

- Mains protection
- Synchronizer
- Transformer Vectorgroup
- 0-359° adjustment
- Generator protection

505HT Hydro Turbine control

ProTech GII Overspeed Protection

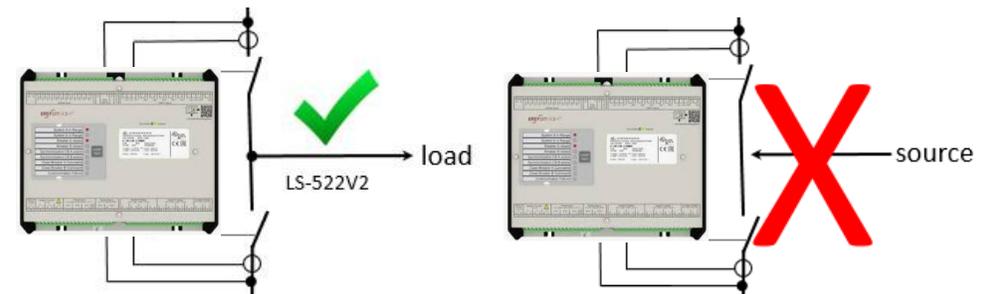

Pre-Defined LS-612XT Application Modes

A05 GCB/GGB	n+1 generators	island operation only	GCB & GGB operation
A06 GCB/GGB/MCB	n+1 generators	island/one mains operation	GCB & GGB & MCB operation
A08 GCB/L-MCB	n+1 generators	island/one mains operation	GCB L-MCB with LS511/521
A09 GCB/GGB/L-MCB	n+1 generators	island/one mains	GCB, GGB, L-MCB with LS511/521
A10 GCB/L-GGB	n+1 generators	island operation only	GCB, L-GGB with LS511/521
A11 GCB/L-GGB/L-MCB	n+1 generators	island/one mains only	GCB, L-GGB and L-MCB with LS511/521
A12 GCB/L-GGBMCB	n+1 generators	island/one mains operation	GCB, L-GGBMCB with LS512/522

In above App Modes all the segmenting is already pre-configured

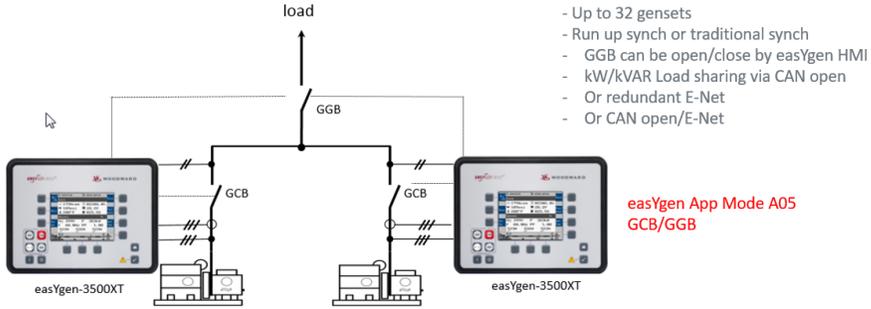

A07 GCB/LSx	n+1 generators	island and/or n+1 mains operation	LS511/512/521/522/LS6XT
A13 GCB/GC	GC-3400XTP1		

- › Segmenting must be done individual according the application
- › Every breaker which must be synchronized requires a LS-6XT controller
- › When using 2 breaker mode in LS-6XT, the load must be always between the two LS-612XT breakers. It is not allowed to receive power (source) between the two breakers, if so, place 2 x LS-612XT in one breaker mode.

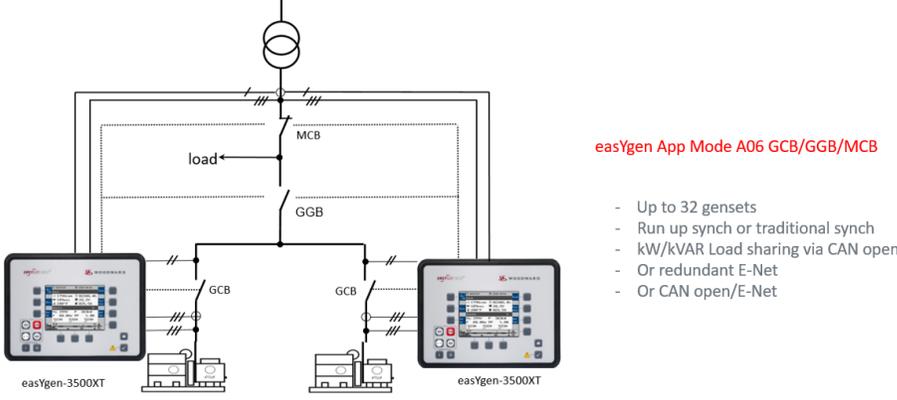

easYgen-3500XT use cases

easYgen-3500XT GGB Support Island Mode

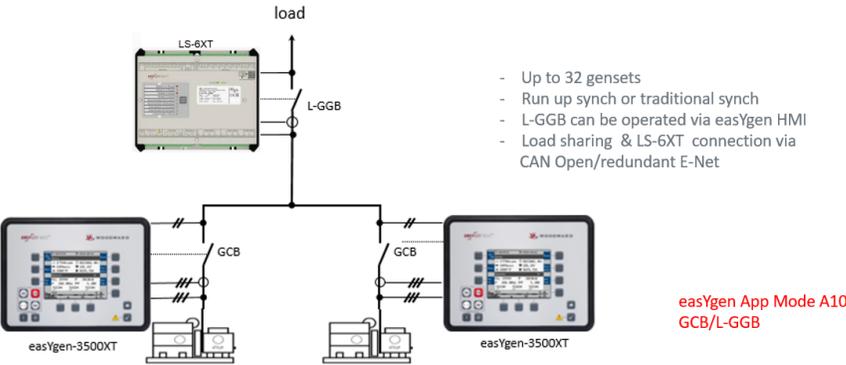

- Up to 32 gensets
- Run up synch or traditional synch
- GGB can be open/close by easYgen HMI
- kW/kVAR Load sharing via CAN open
- Or redundant E-Net
- Or CAN open/E-Net

easYgen-3500XT GGB Support Island & Mains Mode

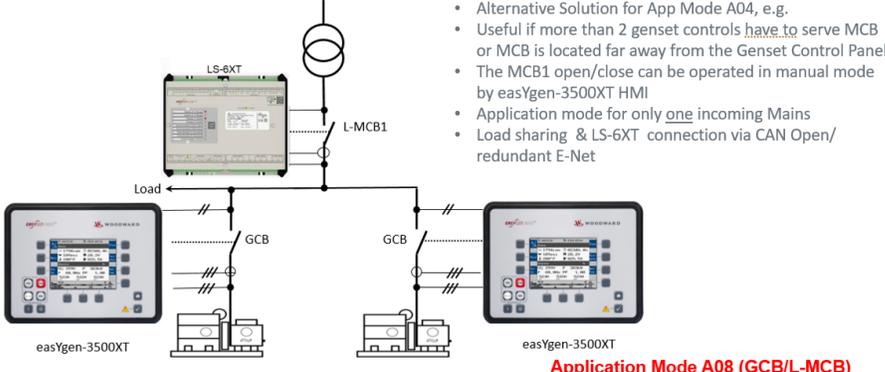

- Up to 32 gensets
- Run up synch or traditional synch
- kW/kVAR Load sharing via CAN open
- Or redundant E-Net
- Or CAN open/E-Net

Multiple gensets island mode GGB

- Up to 32 gensets
- Run up synch or traditional synch
- L-GGB can be operated via easYgen HMI
- Load sharing & LS-6XT connection via CAN Open/redundant E-Net

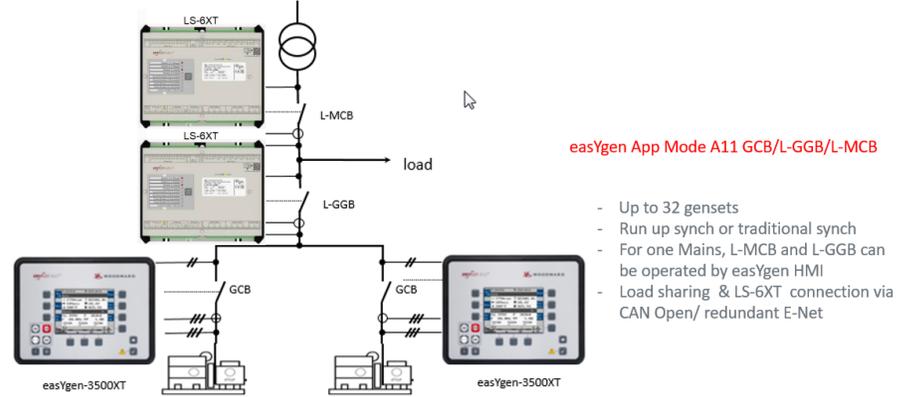

Multiple Gensets only one MCB

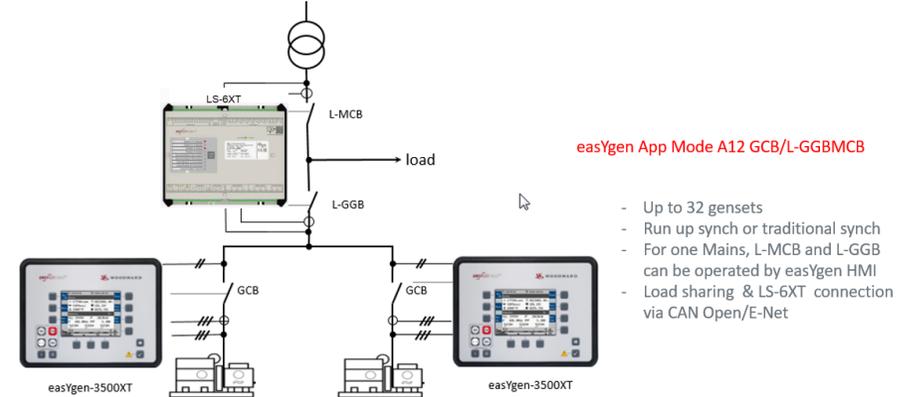

- Alternative Solution for App Mode A04, e.g.
- Useful if more than 2 genset controls have to serve MCB or MCB is located far away from the Genset Control Panel
- The MCB1 open/close can be operated in manual mode by easYgen-3500XT HMI
- Application mode for only one incoming Mains
- Load sharing & LS-6XT connection via CAN Open/redundant E-Net

easYgen-3500XT use cases

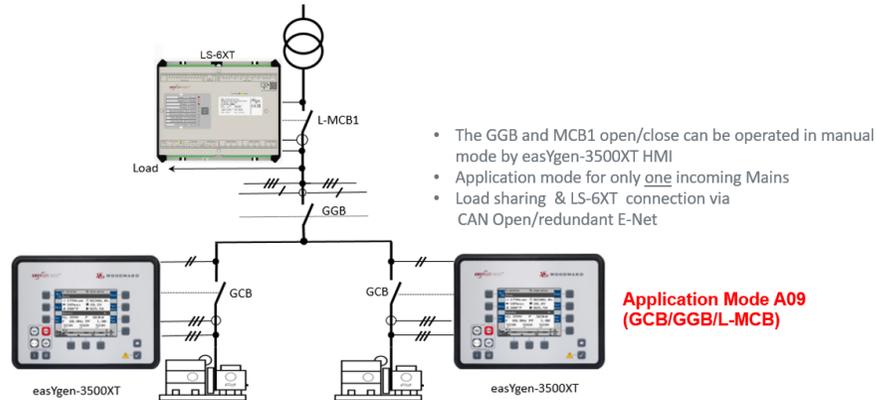

easYgen-3500XT GGB Support Island & Mains Mode

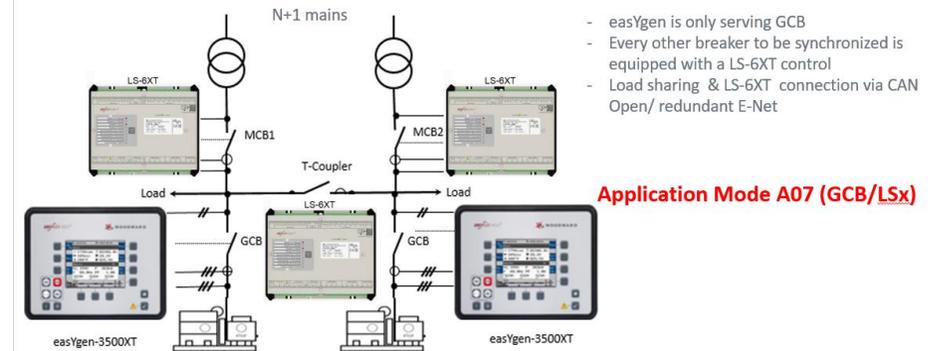

easYgen-3500XT GGB Support Island & Mains Mode

Multiple Gensets only one MCB & one GGB

easYgen-3500XT Multiple breaker application

You have requirement to control and manage

- › more than 32 generators
- › more than 32 breakers
- › more than 64 Segments?

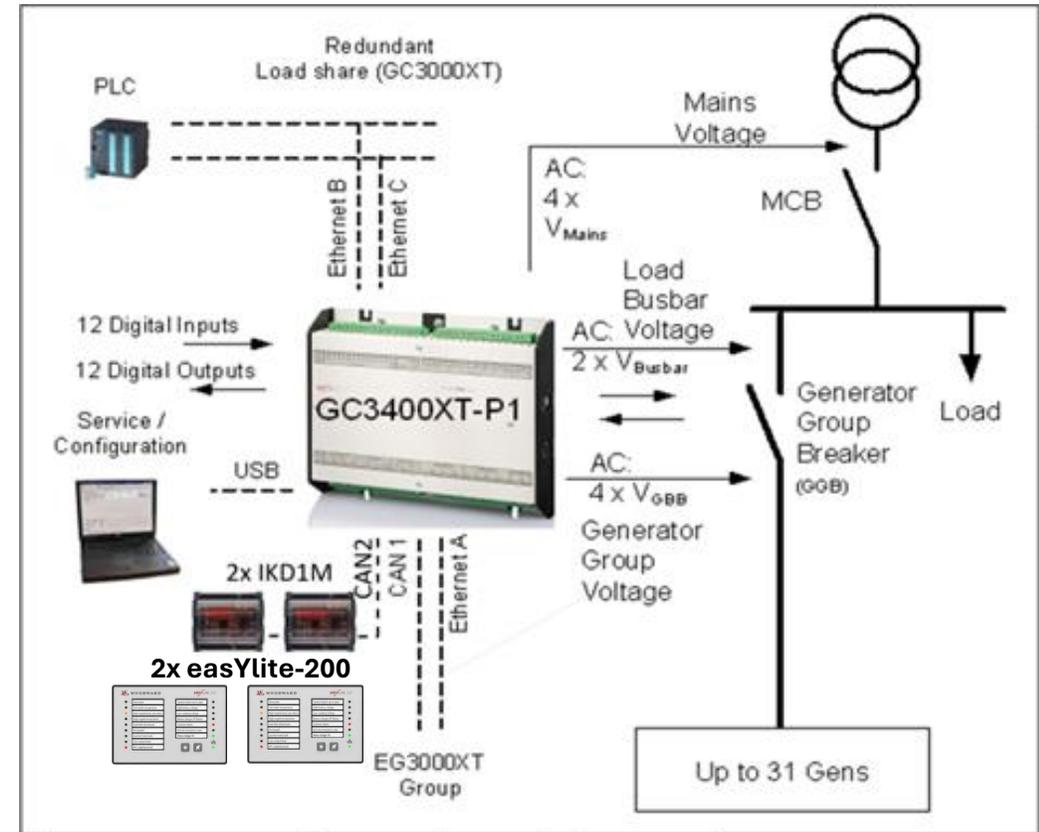

Then Group Controller GC3400XT is a solution

GC3400XT-P1 Group Controller

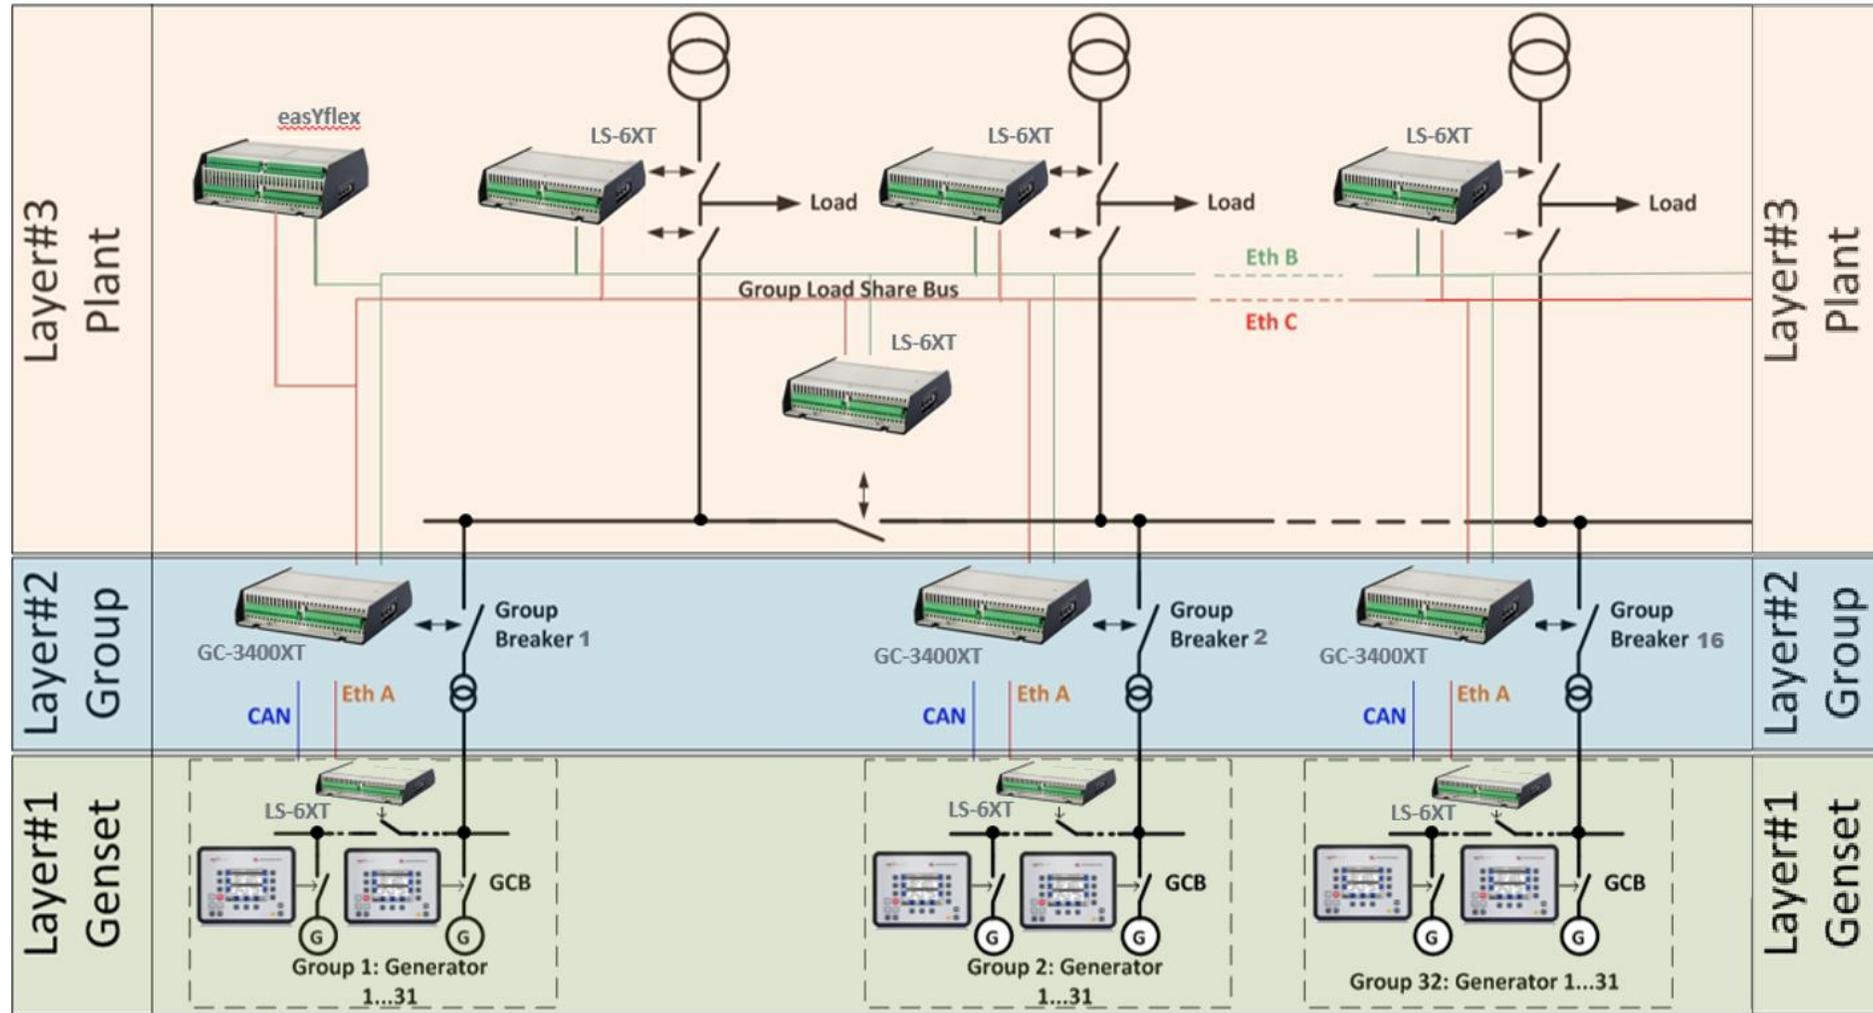

> 8440-2267

- > Allows you to **standardize** on one solution to fit a multitude of applications
- > Runup-Sync and E-Net Modbus Master supported
- > Proven system for managing **large** power generation systems
 - > multiple generators (>2.0) up to 496 generators supported in 16 groups each up to 31 generators)
 - > In a group of (up to 31) or less for modularity
 - > Redundant load share communication at each level, 2 x IKD1M can connected to CAN2
- > Purpose-built to **minimize your effort** commanding your power generation assets
- > **Reduced** point-to-point wiring CAN/ETH communication line between all units

System Architecture

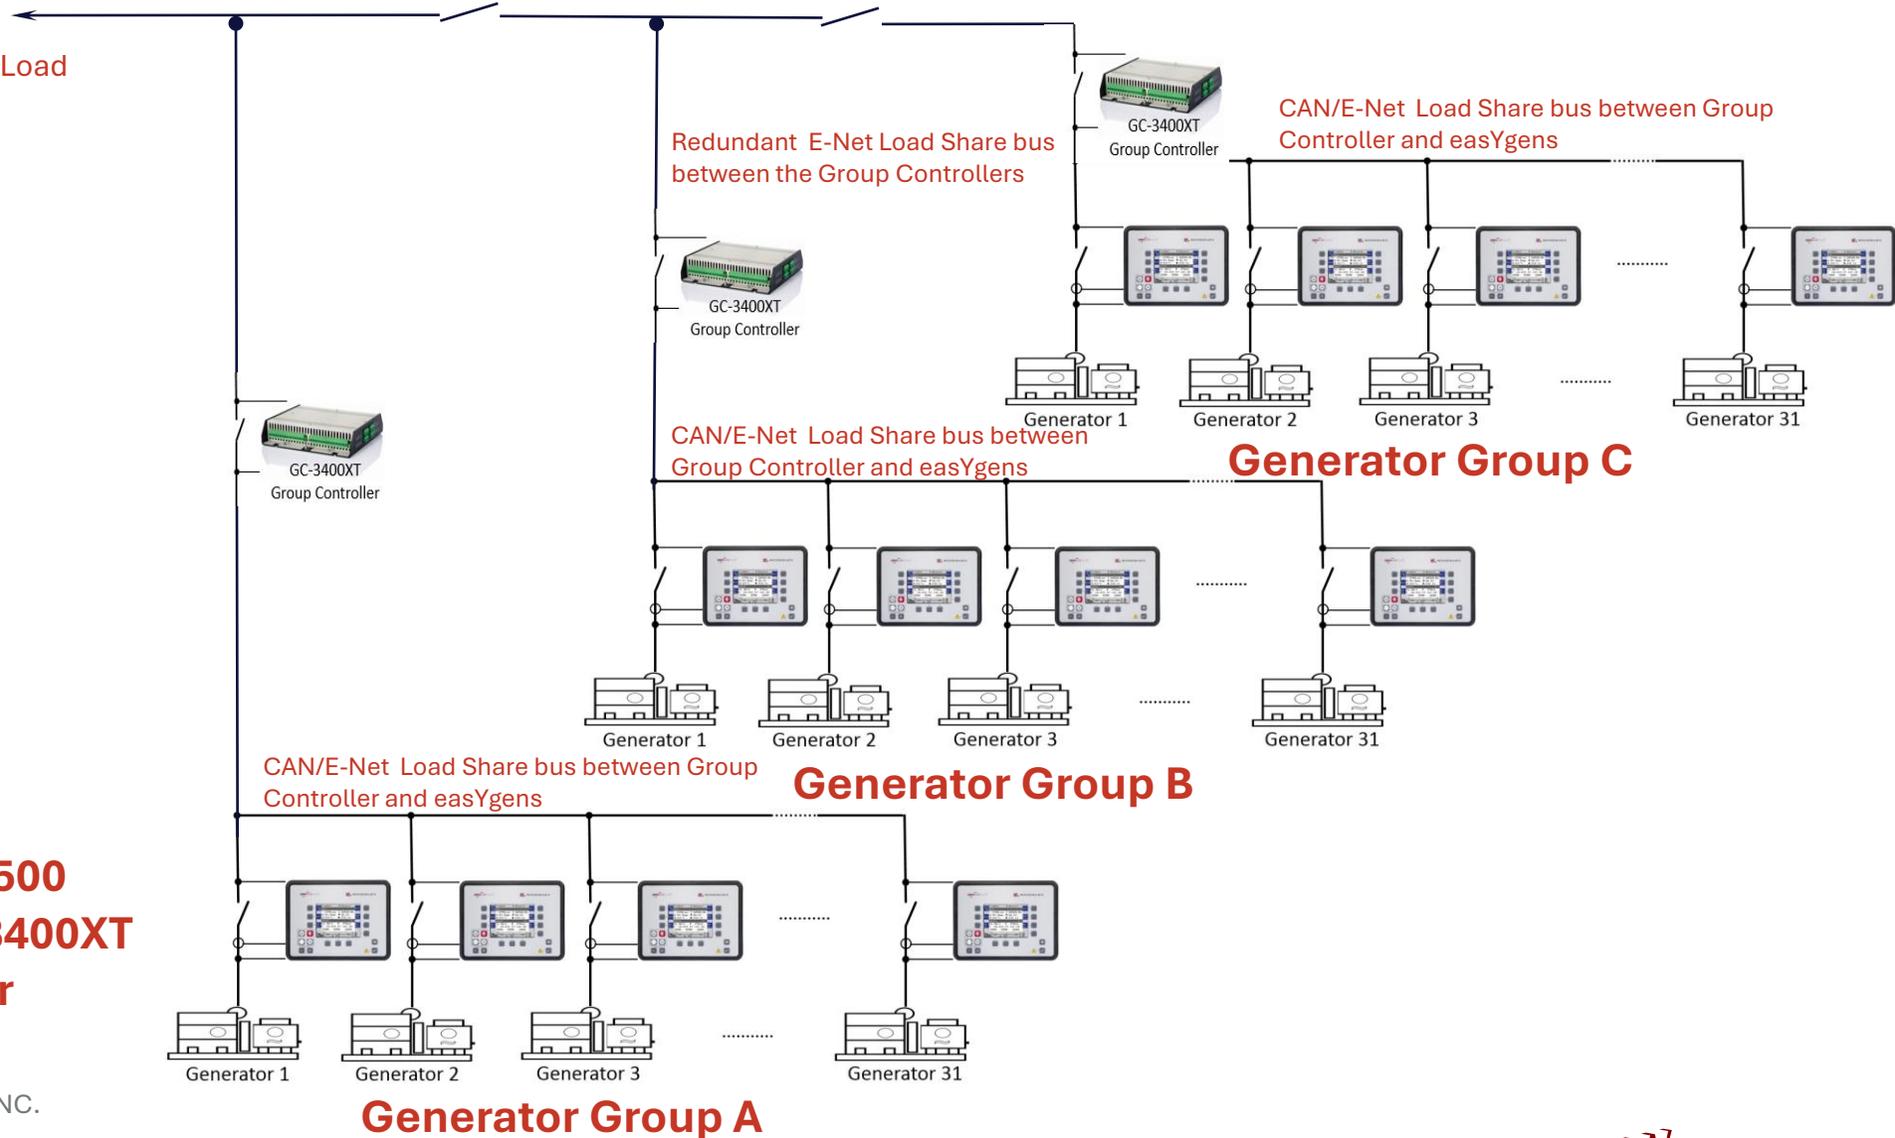

- > up to
 - > 128 Segments on Layer 3
 - > 64 LS6XT's total Layer 3

- > up to
 - > 16 GC-3400XT's

- > up to
 - > 64 Segments on Layer 1
 - > 31 easYgens in each GC-3400XT Group

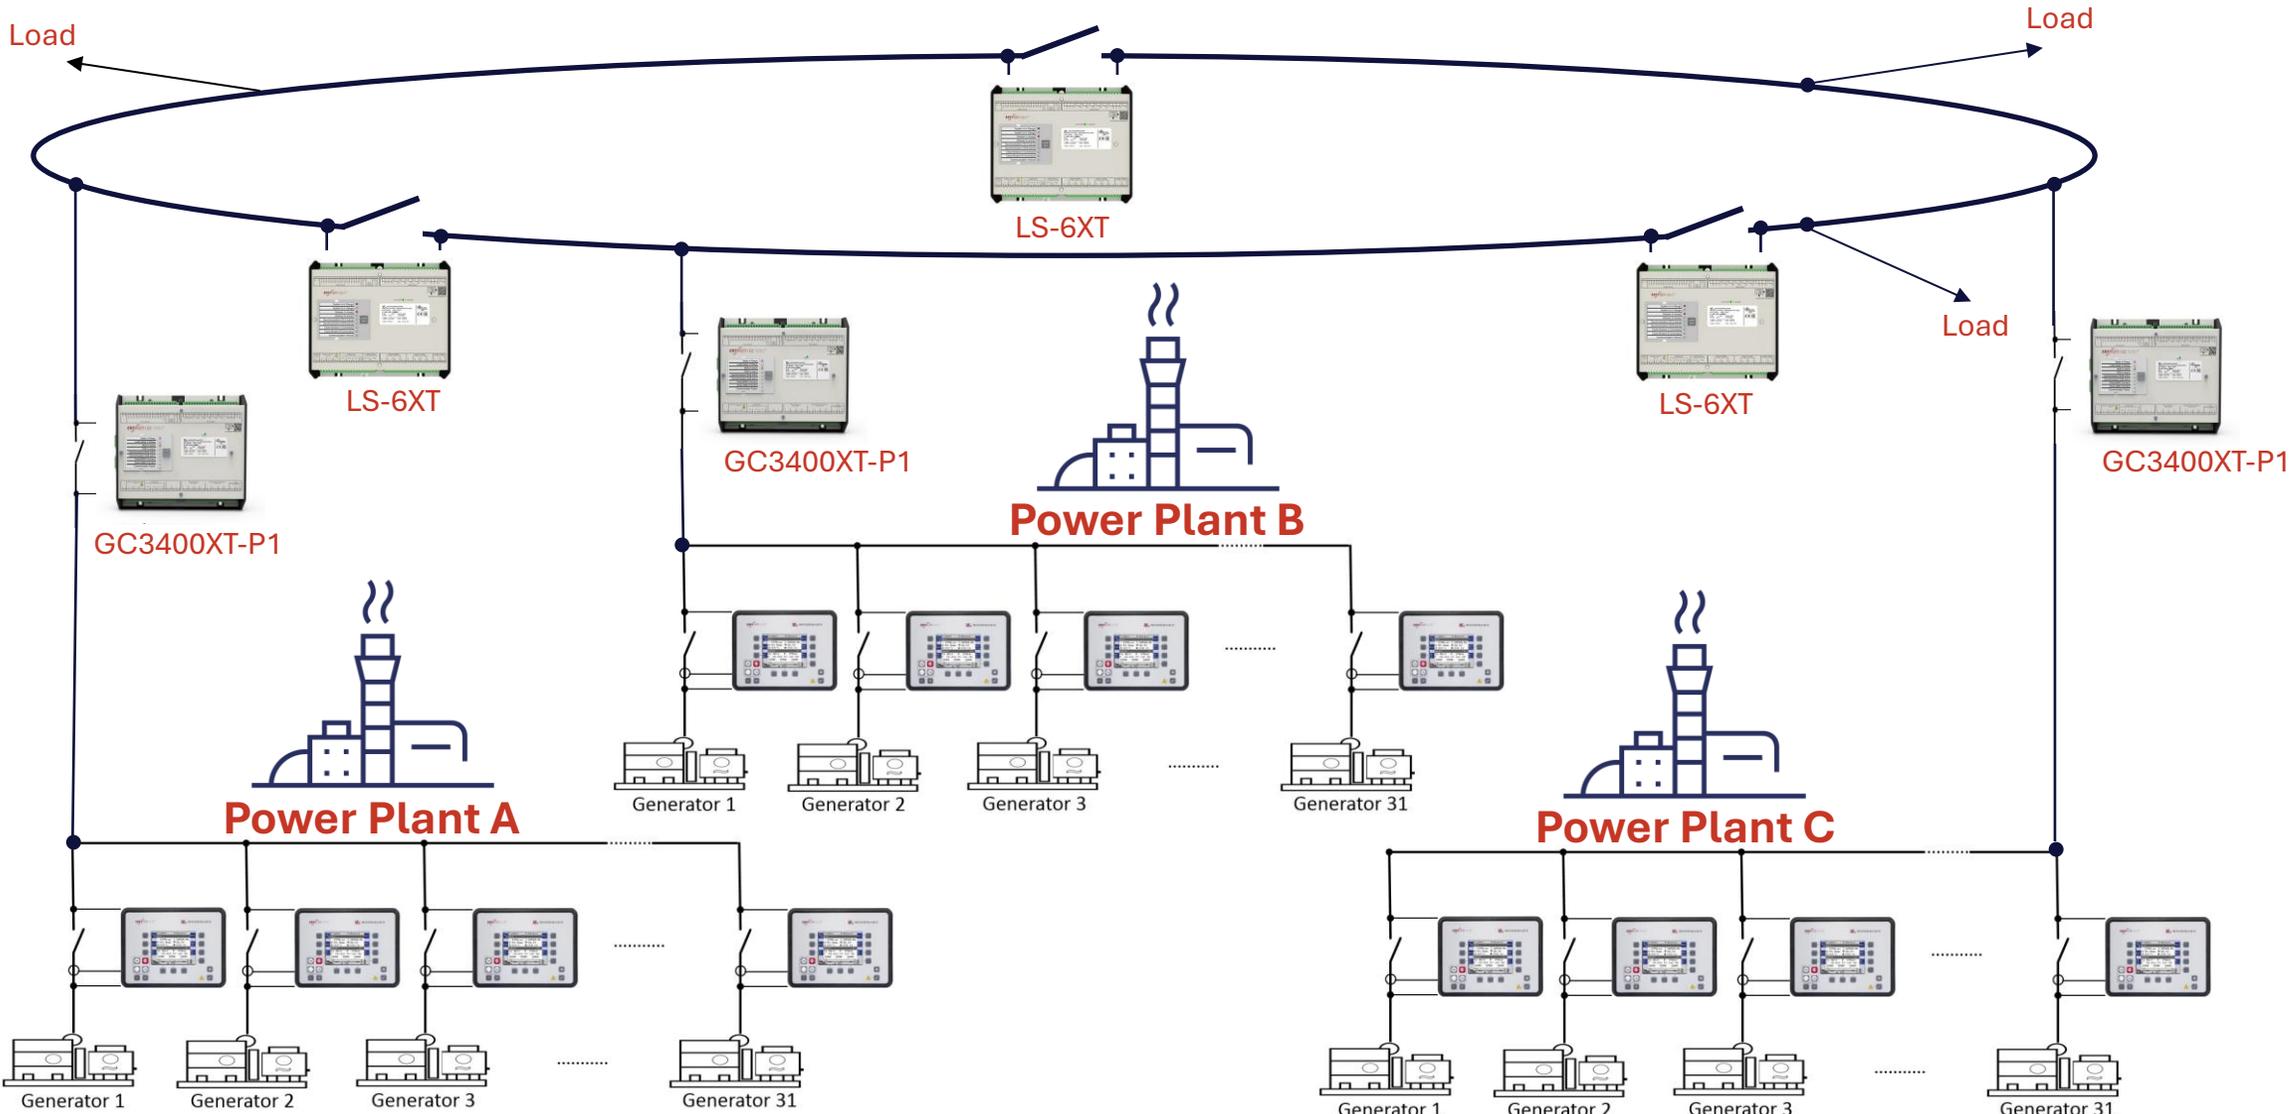

← Generator Group 1...32 →

Use Case Critical Power Application

**easYgen-3400/3500

Group Controller**

Group Controllers balancing 3 HFO power plants

easY-I for inverter based sources

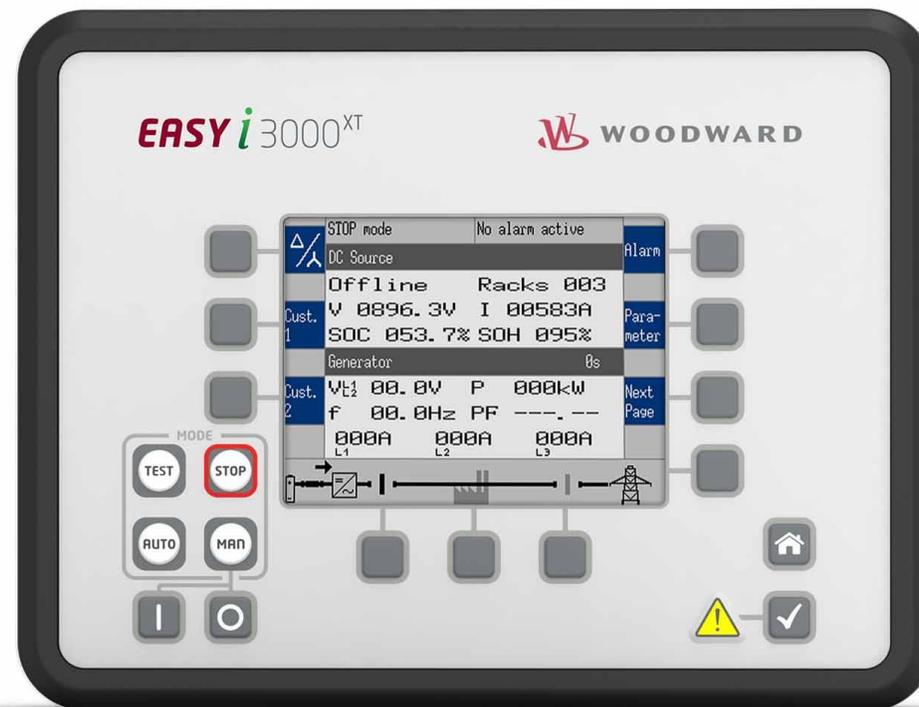

The easY-I-3000XT series takes care about a DC/AC Inverter and connected DC source. The control units can be used in island/mains parallel operation in conjunction with some gensets and is also applicable for stand-by, AMF, peak shaving, import/export or DC charging. Of course, these functions must also be supported by the inverter used.

Seamless integration of easY-I with other easYgen-3000XT platform controls like easYgen-3500XT, LS-6XT and GC-3400XT controls via integral redundant E-Net communication.

Why switch to new DSLC-2XT/MSLC-2XT?

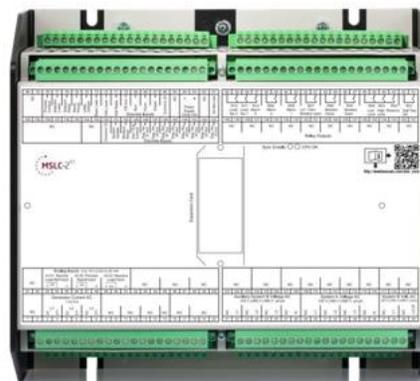

> 8440-1878 DSLC-2-5 & 8440-1978 DSLC-2-1

> 8440-2299 DSLC-2XT

> 8440-1877 MSLC-2-5 & 8440-1977 MSLC-2-1

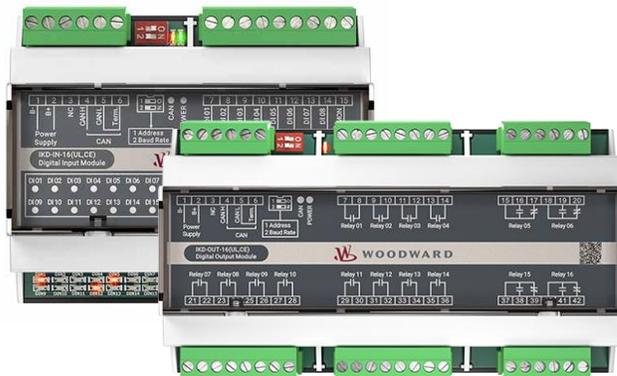

> 8440-2298 MSLC-2XT

- > Same form factor
- > Same mounting dimensions
- > Only one P/N for DSLC-2/ MSLC-2XT
- > Up to 690VAC direct sensing
- > ../1A & ../5A current sensing
- > Drop-in Replacement
- > Class 1 kW sensing
- > Higher galvanic isolation of PID outputs
- > One additional ETH-C port
- > Interoperable with old DSLC-2/MSLC2
- > Manuals & configuration files stored on control
- > USB configuration

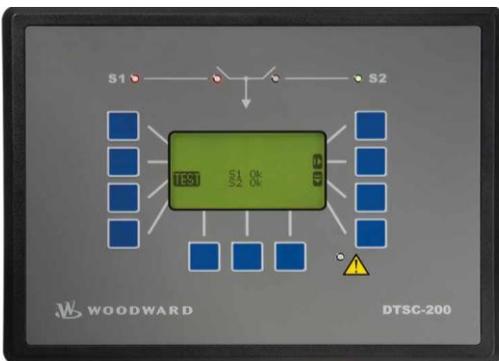

Why switch to new DTSC-200A ATS control?

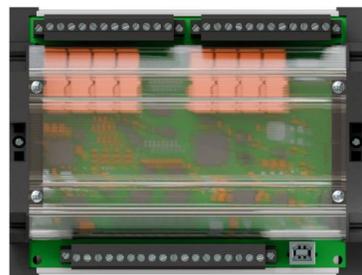

- > 8440-2297 DTSC-200A
- 8440-2323 DTSC-200A-P2 + Modbus TCP

- > 8440-2307 IKD-IN-16 & 8440-2306 IKD-OUT-16

- > 8440-1868 DTSC-200-5

- > 8440-2324 IKD2M

- > 5417-1251 DPC-USB cable

- > Same known Toolkit calibration tool
- > Same DTSC-200 configuration & HMI
- > Same CANopen & Modbus Protocols
- > Re-use of DTSC-200 setting files in DTSC-200A
- > Easier navigation by clear named push-buttons
- > Larger, brighter graphical Display
- > No battery inside to replace
- > Add up to 2 IKD2M's or 1 IKD-IN-16 & OUT-16 I/O expansion cards
- > Standard USB cable required
- > Available from stock!

What to consider when upgrading old to new easYgen-3000/XT DSL-2/2XT MSLC-2/2XT

Run-up Synch Fast Paralleling

click to see the video or scan QR code

4 x 1000 kVA Caterpillar Diesel generator sets paralleled within 7 seconds

Customer problem

Want to parallel $n+1$ backup gensets together in shortest possible time within only some seconds, to shrink Battery UPS backup system, to be able to provide suddenly power for heavy load one genset alone cannot provide or be able to provide total genset load beyond 10 or 15 seconds which is a requirement in many critical applications like Datacenters, Hospitals, Airport, Chemical & Process Industry.

Solution – Run-Up Synch

All the generators are paralleled together by closing their circuit breakers during the engine start sequence. Then after a certain speed is achieved the voltage regulators are enabled and the generators will produce voltage. The run-up synchronization method is used to get several synchronous generators onto load in a very short time. This time is determined by the engine start time and the AVR on-excitation.

- › Run-Up Synch can be done in various App Modes depending on the application, only easYgen-3400/3500XT is required
